Name	: Mr Aram Ghannadzadeh	MR No	: 10101989
Gender	: Male	Bill No	: IC14668425
DOB & Age	: 04-May-1984(40y )	Referred By	: Dr. Ihsan Kommouna
Location	: Endoscopy NS-HBG.B1.166 ENDO 4- HBG.B1.166 ENDO 4-ENDOSCOPY ROOM		
Bill Date	: 26-Mar-2025 13:37	Collection Date	: 26-Mar-2025 13:37
Received Date	: 27-Mar-2025 09:25	Reported	: 02-Apr-2025 16:52
Visit ID	: 1177916		
Test Name	: SMALL BOWELL B DUOD,JEJU,ILEU		

## SMALL BOWELL B DUOD,JEJU,ILEU

**Accession No** : HP25/0523

**Nature Of Specimen** : Terminal ileum. :

Number of SpecimenOne.

### Clinical Information :

1. Glandular hypertrophied mucosa of the terminal ileum
2. Hemorrhoid grade II-III (to be treated locally and to consider doing band ligation)

### Diagnosis :

**Terminal ileum biopsy:**

- **Prominent reactive lymphoid aggregates.**
- **Clinical correlation recommended.**

### Gross Description :

Specimen received in formalin filled container labelled as Mr. Aram Ghannadzadeh and designated as terminal ileum.

Received three tissue bits measuring in aggregate 0.5 x 0.3 x 0.2 cm. Specimen is submitted entirely in one cassette.

Quality of the specimen: Satisfactory.

### Microscopic Description :

The specimen was processed entirely in one block and examined at three levels. Sections show fragments of small intestinal mucosa showing prominent reactive looking lymphoid aggregates. There is no evidence acute inflammation, granuloma, parasites, metaplasia, hyperplasia, dysplasia or malignancy. Clinical correlation is recommended.
